MONCRIEF "YEARS AHEAD" GAS FIRED AIR CONDITIONING UNIT (Steel Heating Element)

In this new, automatic, gas fired air conditioning unit, Moncrief offers you the very finest in "Years Ahead" heating equipment.

This unit will provide completely automatic heating satisfaction that is truly "Years Ahead." Your home will glow with an abundance of warmed, filtered, humidified air on cold wintery days and will be filled with circulating air on hot, sultry summer days.

You can rely on Moncrief's experience of over fifty years in developing "Years Ahead" heating equipment. This experience has provided this unit with a steel heating element that is automatically welded gas-tight and leak-proof. Everything, even the controls are housed inside the striking, baked enameled cabinet. Here's a heating plant that will give you long years of trouble-free heating comfort.

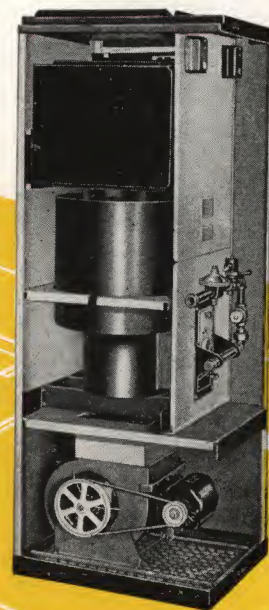

MONCRIEF UTILITY AIR CONDITIONING UNIT

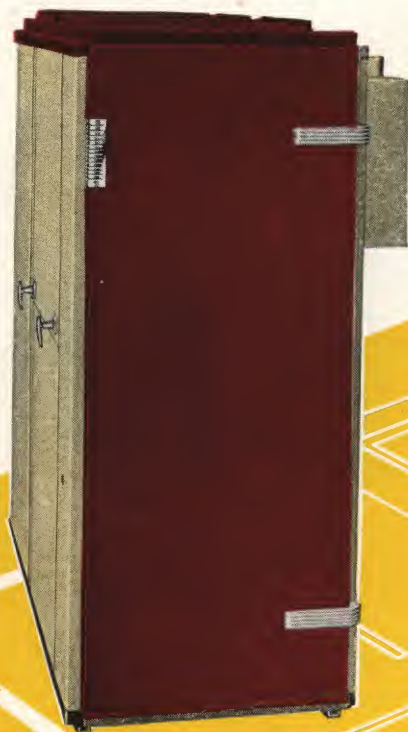

If the plans for your dream home do not provide a basement, you can still enjoy the finest in "Years Ahead" automatic heating comfort with this Moncrief Utility Unit.

Into this unit are built all the fine "Years Ahead" operating and construction features that comprise the basement unit. It's economical to own—to install and to operate.

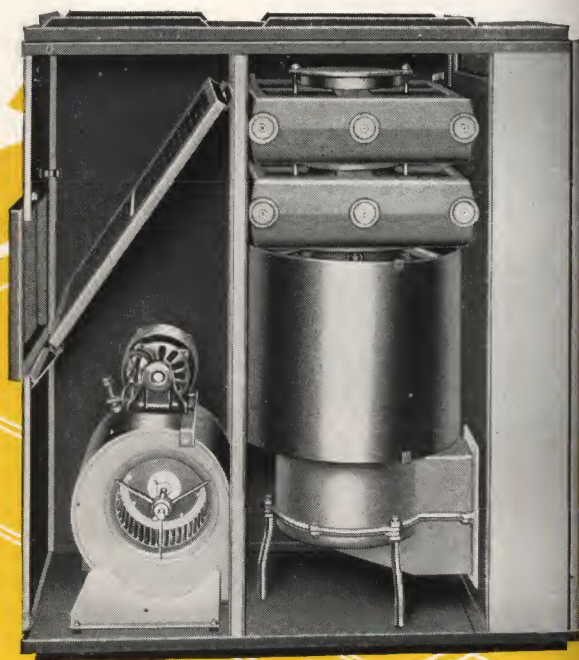

You'll get "Years Ahead" trouble-free, heating for years and years.

MONCRIEF GAS FIRED AIR CONDITIONING UNIT

(With Cast Iron Heating Element)

To delight the home-planner who prefers a gas fired air conditioning unit of cast iron construction, Moncrief engineers have scored again with the tightest, most leak-proof cast iron heating element that has ever been developed. Your worries about fumes—dirt—cracks—repairs—can be little worries, because Moncrief engineers knew of these “bugaboos” commonly found in most cast iron constructed heating units and devoted their best efforts to eliminate them.

You can make the new Moncrief cast iron air conditioning unit a part of your new plans with complete confidence that you will get long years of operating and maintenance satisfaction.

The smart, attractive, baked enamel cabinet that will enhance any heating scheme is easy

to keep clean. And remember, all operating parts are *inside*—even the controls are behind the easy-opening louverless door.

MONCRIEF'S UTILITY MODEL WITH CAST IRON HEATING ELEMENT

Here again you can enjoy the same construction features, the same operating satisfaction and the same automatic, care-free heating comfort as you can with the cast iron basement model. All these features are packaged in this “mighty-little” unit that can be installed in any hall, or utility room or even a closet. This unit fits any basementless home plan.

MONCRIEF

GAS FIRED GRAVITY FURNACE

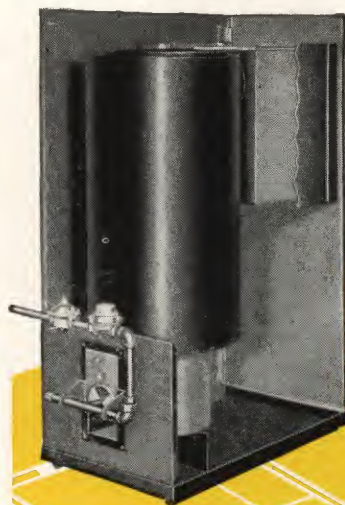

(Steel Heating Element)

Your home plans may be such that this new, Moncrief gas, gravity furnace will provide all the comforts and conveniences that modern, automatic heating affords.

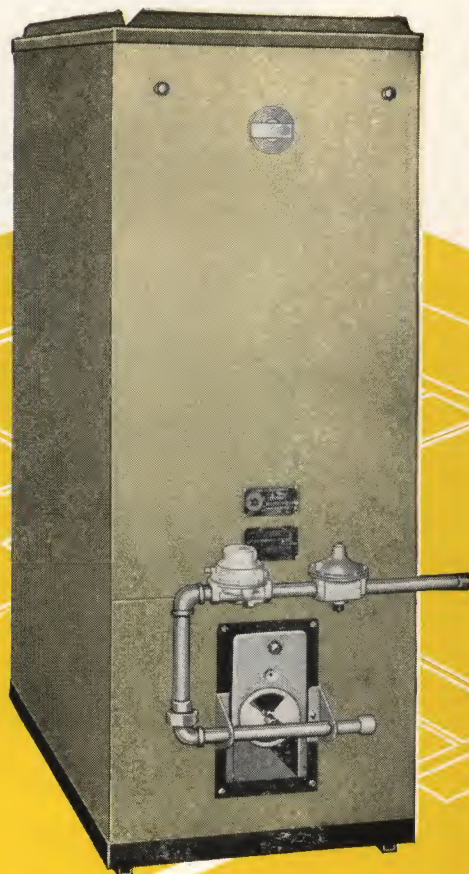

Just think—your job for the winter is done when you set the thermostat and light the pilot. There isn't anything else to do with a Moncrief gas furnace.

Also, gas heating with a Moncrief is clean heating. There's no dust or dirt, your home furnishings stay clean longer. You can even have a large clean basement to make use of. Don't be satisfied with just any gas heating system, when a Moncrief will give you "Years Ahead" service and at a cost that is little, if any, more than the cost of any other fuel.

Moncrief Gas gravity furnaces are also available with cast iron heating elements.

Vaporizing Oil Fired Air Conditioning Unit

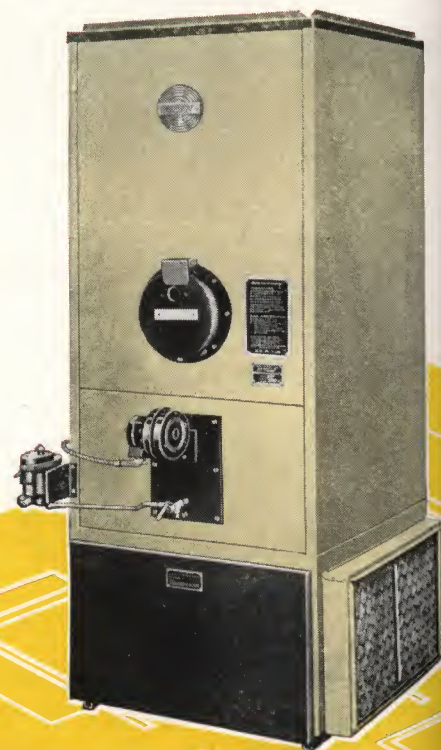

MONCRIEF VAPORIZING OIL FIRED AIR CONDITIONING UNIT

A Moncrief, vaporizing, oil fired air conditioning installation can fit into your new home plans as a surprisingly low cost item in your building appropriation. All the most modern, approved features in design and construction for dependable, efficient oil fired heating are built into this unit.

First of all, your operating costs will be low. Your maintenance and upkeep costs will be low, also! Servicing is quick and easy as all parts are unusually accessible. There's little danger of dirt and fumes getting into your home since the heating element is of steel construction with automatically welded, leak-proof and gas tight seams.

Your family's comfort will be assured by the abundance of healthful, humidified air that will fill every nook and corner of the home.

This Unit bears the seal of the Underwriters Laboratories.

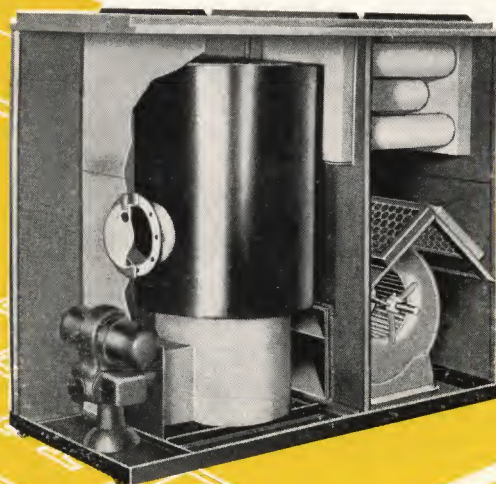

MONCRIEF VAPORIZING OIL FIRED UTILITY MODEL

Your plans for the small home can be so complete with Moncrief's Vaporizing Air Conditioning Utility Unit. It requires so little space — yet does such a remarkable home heating job.

The trim, baked enamel cabinet, that is so easy to keep clean, houses the gas-tight, leak-proof steel heating element. Your home and furnishings stay cleaner longer. Your cleaning chores are reduced to a minimum. No dirt or fumes can get into your home.

This unit bears the seal of the Underwriters Laboratories.

Interior view showing unit equipped with Gun Type Oil Burner

MONCRIEF "YEARS AHEAD" OIL FIRED AIR CONDITIONING UNIT WITH GUN TYPE OIL BURNER

For the finest in oil fired air conditioning equipment there is none better than Moncrief's new, completely automatic, gun type, oil fired air conditioning unit. Here is the last word in oil fired heating. You'll get all you expect and more in speedy, economical, dependable heating comfort and satisfaction.

There is no unit built to give any greater, more satisfactory performance.

Your home will glow with an abundance of clean, healthy, conditioned air all winter long. You'll get an

abundance of constantly circulating air on hot, sultry summer days from the large, quiet, air handling equipment.

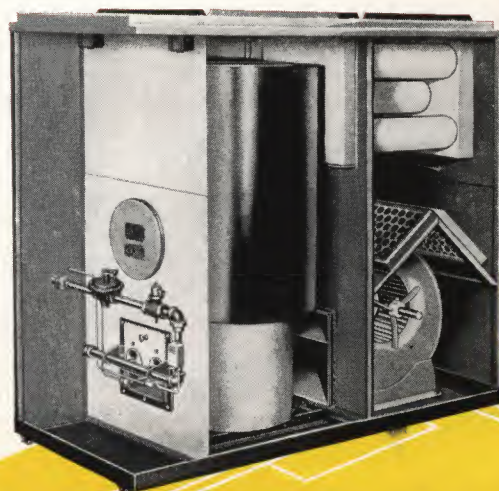

Your home cleaning—your maintenance will all be reduced to a minimum because no dirt or fumes can get into your home as the entire heating element has automatically welded, non-porous, leak-proof and gas tight seams.

The smartly styled, baked enamel cabinet, so easy to clean, enhances any heating installation.

THE BURNER BURNS GAS AS WELL AS OIL

Seldom do you find a unit so superbly designed and constructed as to be equally efficient in either a Gas or an Oil fired installation. This Moncrief unit has the qualifications necessary for either Gas or Oil—so, is also available with the Moncrief Ribbon Type Gas Burner. When equipped with a gas burner it carries the A. G. A. seal of approval.

To change from one fuel to the other, at any time, it is just necessary to change the burners. You don't have to change the heating unit or buy a new one.

MONCRIEF "ALL FUELS" STEEL AIR CONDITIONING UNIT

Here is just that furnace that will meet any fuel problem—you can safely install it to burn any fuel—coal or gas or oil.

The design and construction that provides long fire travel and large heating surfaces so necessary and essential for an "All Fuels" Unit are all built into this advanced design.

Heating element is heavy steel, automatically welded gas tight. Automatic humidifier adds the moisture necessary for health. Air filters remove dust, dirt and pollen. Blower fan delivers warm air under positive pressure; will provide constant air circulation in hot weather.

Air Conditioning Unit, equipped
with Grates for Coal Burning.**

MONCRIEF COAL FIRED GRAVITY FURNACES CAST IRON HEATING ELEMENT

When a dependable, highly efficient heating plant is desired, this furnace has been the "people's choice" for over fifty years.

Heavy cast iron construction with a minimum of joints—heavy duplex grates or triangular bar grates make this furnace an outstanding value for the low priced home.

You can get this furnace either with a square, baked enamel casing or the conventional round type casing.

STEEL HEATING ELEMENT

In this heavy duty, steel furnace you get the same rugged construction as in the "All Fuels" air conditioning unit—and at a surprisingly low cost.

The heating element and radiator have automatically welded, non-porous, leak-proof seams. Fire chamber is lined with fire brick. Made in two styles, square enameled casing or the conventional round type casing. You'll get long years of trouble-free heating comfort with this coal-fired furnace.
